Eclipse Dataspace Connector (EDC)

Catena Portal Guide

To facilitate seamless integration with the Eclipse Dataspace Connector (EDC) and CatenaX portal, please refer to the detailed instructions provided in the [Catena Portal Guide](#).

Data Retrieval Guide

Efficient handling of EDC requests and utilization of its RESTful APIs are crucial for optimal data retrieval. Refer to the comprehensive [Data Retrieval Guide](#) for detailed instructions and best practices.

Application

For the successful deployment and operation of the application, adherence to certain prerequisites and meticulous installation procedures is essential.

Prerequisites for EDC Integration

- Proper registration of the company on the CatenaX portal.
- Setup and configuration of the Eclipse Dataspace Connector according to organizational requirements.

Installation Guide

An installation guide, tailored specifically for local development environments, is available for reference. Follow the [Local Development Guide](#) for comprehensive instructions on installing and configuring the application.

API Sample Endpoints

Access Swagger UI for API documentation: <http://localhost:8080/swagger-ui/index.html#/>
